Summary

Operations and project professional with experience across technology, software projects, and business operations. I have worked with technical teams, management, clients, and suppliers on software, infrastructure, automation, and integration projects. My experience also includes Jira and Confluence administration, operational planning, documentation, and process improvement. I am interested in operations, project, and product-related roles in technology companies and startups.

Areas of Interest

Business Operations • Product Operations • Technology Projects • Digital Products • AI & Automation
