Summary

I have a background in operations, project management, and communication from startups and growth-stage companies. At Traced Systems, I work across tech, marketing, and leadership to support planning, coordination, and business priorities. Through Millennial Consulting, I helped coordinate weekly workshops and events, worked with volunteers, and supported communication across teams. I enjoy fast-moving environments, handling multiple tasks, and solving problems in a practical way. I am currently learning web development through Hack Your Future bootcamp and building my skills in JavaScript, React, Node.js, HTML, and CSS. My MSc thesis focused on how AI can improve processes in Danish debt collection companies. I am also comfortable with structured tracking, operational follow-up, and learning finance-related tasks such as forecasting and reporting.

Related Work Experience

Head of Operations

Traced Systems | Oct 2025 - Present

A Danish company that provides a Digital Product Passport (DPP) platform helping companies turn regulatory pressure and sustainability demands into trusted, data-driven product journeys across the full lifecycle.

- Coordinate weekly alignment between tech, sales, and leadership to ensure delivery of priorities.
- Maintain execution tracking in Jira, updating tasks, ownership, and progress across projects.
- Translate leadership priorities into structured execution plans, including tasks, timelines, and follow ups.
- Support business planning by collecting inputs for revenue targets, pricing assumptions, and hiring needs.
- Support market research and benchmarking by structuring insights for decision-making.
- Improve operational clarity by defining roles and responsibilities for an 11-person team.

Hobbies

I enjoy spending time with family and friends, playing basketball, and exploring nature. I've been passionate about chess since childhood, have won several national youth medals, and still love a good match (want to play sometime?). Also a lifelong Lego enthusiast who can spend hours building Lego sets.
